

Edirol is a leader in the sound module field and has created a series of high quality, easy to use products. The SD-80 provides a full array of General MIDI II voices in a 64 voice polyphonic device. With this module, 1050 tones and 30 drum sets are accessible from your pipe organ console. Pistons or stop controls can activate voices on the manuals you select, similar to the way a combination action works for stops.
